

LAND ACQUISITION

COMMISSION STRUCTURE

WHAT IS MRC?

MRC stands for Most Recent Comparable: the closest, most recently closed land sale that matches the subject property on location, lot size, shape, topography, flood zone, and frontage. In Texas, sold prices come from Unlock MLS or a confirmed closing statement, not from county records, so every MRC is documented in the deal file.

HOW DEALS ARE STRUCTURED

Each deal is graded by how closely the under-contract price tracks against the MRC. The smaller the differential, the stronger the deal, and the higher the commission to the agent.

$$\text{MRC Differential} = | \text{Contract Price} - \text{MRC} | \div \text{Contract Price}$$

DEAL CLASSES AND AGENT COMMISSION

CLASS	MRC DIFFERENTIAL	AGENT COMMISSION
Class A · Great deal	3% or less	3.25%
Class B · Good deal	3.01% to 6%	2.50%
Class C · Average	6.01% to 9%	2.00%
Class D · Below average	9.01% or more	1.00%

If the contract price comes in below the MRC, the deal is automatically Class A.

EXAMPLES · \$1,000,000 CONTRACT PRICE

MRC	DIFFERENTIAL	CLASS	AGENT EARNS
\$1,000,000	0%	Class A	\$32,500
\$950,000	5%	Class B	\$25,000
\$900,000	10%	Class D	\$10,000

The same commission structure applies to deals sourced for the internal Development division and for lots placed with builder partners.
